

Snowball CVC Word

Level 2

Adult Guidance

This activity is designed to be used in a large activity tray. The **Word Builder Mats** and **Snowball Cut-Outs** could be laminated for longevity if needed.

Ask children to choose a word builder mat and say the object they can see in the picture. Encourage them to robot-talk (segment) the word and use their 'robot arms' to help say each sound in the word. Look for the corresponding letters on the **Snowball Cut-Outs** and place them onto the **Word Builder Mats** to spell out the word.

Variations

Magnetic Letters

You could replace the **Snowball Cut-Outs** with magnetic letters and ask the children to make the words with them instead.

Writing

Print and laminate the **Word Builder Mats** and ask the children to write on these using a whiteboard pen. Encourage them to robot-talk the word and use their 'robot arms' to help say each sound in the word before writing.

Enhancements

You could even set this resource up in a large activity tray surrounded by fake snow or eco-glitter to add an extra bit of Christmas 'magic' to the activity.
